

# CARELESS COLLECTION SPREADS INFECTION

Infections carried in urine can easily be passed from hand to hand, door-handle or tap. These can include Chlamydia, Gonorrhoea, Hepatitis B and C, Ebola and MRSA, as well as common organisms of urinary tract infection such as E Coli, Proteus, Klebsiella and Staphylococcus saprophyticus.

## Careful Collection Controls Infection

**Peezy Midstream  
gold standard  
urine specimen  
collection.**

**Eliminates mess.**

**Promotes accurate  
diagnosis.**
